medDispense®
Automated Dispensing Series

Medication and Inventory Management that's
easy-to-use, easy-to-afford, not easy to be without.

med**DISPENSE**®

TouchPoint Medical's automated dispensing systems streamline inventory and medication management, increase efficiency and help to ensure a better patient and caregiver experience. The *medDispense*® system provides the perfect combination of security, simplicity, affordability and support for acute and specialty care facilities of all sizes.

Easy-to-deploy, easy-to-use and even easier on your budget.

## The medDispense® Advantage:

Secure 24/7 access.

Intuitive, user-friendly software.

Modular system configurable to your needs.

More affordable than typical systems.

Fast, responsive service and support.

TouchPoint
MEDICAL

Simplicity Advantage.

The *medDispense®* user interface is quickly learned and easy to operate – saving time and allowing you to focus on patient care. The system secures both your medications and supplies and seamlessly integrates with virtually any HL7 compliant hospital information system, automatically capturing dispensing, usage, and billing information.

(Meets all HIPAA requirements and fully ODBC compliant, it can be used with Crystal Reports.)

IT'S EASY TO OPERATE
THE VERY FIRST TIME.

## How does easy-to-use software improve efficiency and help with nurse adoption?

- Most users can be fully trained in 10-15 minutes.
- Faster access and vending times reduce time at the ADC.
- Remote features allow nurses to save time.
- Software runs quickly and reliably.
- Touchscreen interface is easy to understand.
- Allows for rapid system deployment and installation.

DISPENSE MEDICATION

TouchPoint
MEDICAL

Affordability Advantage.

medDispense® systems provide the safety and availability of an automated dispensing solution without extra bells and whistles that increase cost and complexity.

Because the system provides full connectivity and integration with most operations software, medication use and costs are captured immediately upon dispensing, streamlining operations and improving reimbursement.

| 2 Door Combo Tower | 4 Door Supply Tower | Base 72 | Base 45 with Auxillary Supply | Combo Tower | Base 25 Mini with Supply Tower |

Simple. Specific. Solutions.

The *medDispense®* system is scalable to the specific needs, and budgets, of diverse healthcare facilities. Configurations may include base units, auxiliary units, accessories and software. Our solutions are scalable for a wide spectrum of care settings including: long-term care, residential treatment centers, small & large hospitals.

Single wide and double wide locking return drawers available.

How does medDispense® offer an affordable alternative to med management?

- No long-term contacts required
- Modular system to fit your needs
- Easy deployment with quick training.
- Single, dedicated med drawers reduce needless errors.
- 24/7 support for less downtime.
- Not paying for extra features you'll never use.

MEDICAL

Facility Advantage.

medDispense® systems meet the needs of the medical community, providing an affordable solution to the problem of providing secure, around-the-clock access to medications. The reasonably priced systems are about one-third less than other systems and are the ideal solution for both single installations at smaller facilities as well as multiple placements in large hospitals.

How does medDispense® improve the med delivery process in your hospital?

- Improves patient care by reducing errors.
- Intuitive software increases nurse adoption.
- Boosts caregiver efficiency with features like TouchPoint Medical *NurSync™.*

New TouchPoint Medical *NurSync™* software allows clinicians to select and remotely queue patient medications, quickly and securely from any authorized workstation. Clinicians now have enhanced control over the med management process without the hassle of making multiple trips or dealing with time-consuming ADC lines, providing more time for patient care.

NO WAITING IN LINES AT THE ADC

REDUCTION IN STAT RUNS

ENSURES REGULATORY COMPLIANCE

How does medDispense® improve the med delivery process for long-term care facilities?

- Increases available medications on-site.
- Facilities can administer meds securely and easily 24/7
- Remote authorization ensures regulatory compliance for controlled substances.
- Improves patient care by reducing errors
- Reduces stat runs.
- Software allows remote reporting and inventory alerts.

medDispense® systems feature our remote digital authorization software that provides pharmacists 24/7 security and control over medications in long-term care facilities without being onsite. This allows them to work more efficiently, generate a stronger ROI, and improve patient care from virtually everywhere.

Support Advantage.

TouchPoint Medical understands how important uptime is to keeping clinicians efficient. So that's why we've designed service programs tailored to help you do just that.

Only TouchPoint Medical knows our products like we do, down to every bolt and screw. Only TouchPoint Medical provides you with the factory authorized parts designed to work specifically with your equipment. Your investment is too important to risk with anyone else.

Because your investment is too important...

Protect your investment with our Enhanced Service Program,
TouchPoint Medical™ ESP℠

TouchPoint Medical understands how important automated dispensing is to your facility. So that's why we've designed service programs tailored to help you.

Design & Layout	Installation & Deployment	Ongoing Support	Extended Warranty	Upgrades & Retrofits

TouchPoint Medical™ **Advance**

Time is money...
TouchPoint Medical has created a seamless process designed to get you up and running as quickly as possible. Certified technicians and professional support ensure proper installation of all your critical components and training of your staff.

TouchPoint Medical™ **Care**

Your focus should be on your patients, not your software...
Premium access to our technical support resources provides you with the peace-of-mind that your systems will continually be updated with the latest bug fixes and patches. It's an unbeatable advantage.
